

Malta, 24<sup>th</sup> October 2016

## MFCC Home & Interiors Exhibition 2016 – Malta

The cutting-edge AHT Advanced Amorphous Metal Ribbon Technology was presented in a very powerful and effective way by the AHT Malta Team at the **MFCC Home & Interiors Exhibition 2016 - Malta** between 20 – 23 of October. The **MFCC Home & Interiors Exhibition** is one of the most important annual fairs in Malta and was visited by many thousands of visitors looking for innovative products for their homes.

The **Alternative Technologies** team of **Marco, Liz, Mathew, Maria and Mario** under the general command of **Mr Mario Cachia** worked with extraordinary passion and zeal to present the AHT Amorphous Ribbon Technology to an eager Maltese public. Mr Mario Cachia made 2 live presentations of AHT in English and Maltese which drew crowds of curious Maltese watching and listening with great interest. Many hundreds of people passed through the Alternative Technologies stand and already there are tens of quotation requests and further meetings arranged with Architects, Builders, Engineers and other professionals.

We would like to warmly thank and congratulate the AHT Malta Team of **Mario, Marco, Mathew, Maria** with a special commendation for **Liz** who modelled the AHT Heating Vest and was voted unanimously as **Miss AHT International 2016**. At the end a delighted Mario Cachia quipped “***With such a fantastic response from the visitors to our stand very soon AHT will be the number one heating brand in Malta. Its not if any more, just when!!***”
